Abstract

Editor-in-Chief has retracted five articles from the special issue Vol. 7 No. 18 (2019): Sep 30 (Global Dermatology) [1], [2], [3], [4], [5].

An internal investigation has raised sufficient evidence that they are not directly connected with the special issue Global Dermatology and contain inconsistent results. Several co-authors requested to be excluded from the author list. As such, we retract these articles from the literature and by guidelines and best editorial practices from the Committee on Publication Ethics. We apologize to our audience about this unfortunate situation.
